

CM 260

THERMAL INKJET PRINTER

Cyklop CM 260 – The next generation of thermal inkjet printers

The Cyklop CM260 controller with multiple printhead options delivers substantial printing benefits. The large 10" touch panel control enables both ease of operation and monitoring of print operation. Up to 6 printheads delivers printing 6 line positions or offering print of up to 152.4mm (6 Inch) high print. The Cyklop CM260 offers best in class high quality printing with Thermal Inkjet Technology

Technical Data	
Print technology	Thermal Inkjet
Throw distance	Up to 5 mm
Print height	Up to 25.4 mm (1") per print head
Printing speed	Up to 76m/min at 300dpi
Resolution	Up to 600dpi
Languages	English and more
Fonts	Windows true type fonts
Controller (L x B x H)	305 x 64 x 200 mm
Print head (L x B x H)	140.5 x 45 x 83 mm
Touchscreen Display	10" (254 mm)
Power supply	AC 100 - 240V, 50/60Hz, 2.5 A
Inks	Water and solvent based for different materials
Options	Print head anti-shock, ext. sensor, encoder, traffic light

A 2 m long print head cable to the controller allows flexible installation in your production environment.

Free design content such as texts, date formats, times, logos or barcodes can be programmed simply using the touchscreen. Resolutions with up to 600 dpi and message lengths up to 1.5m allow almost unlimited printing options.

A DB-15 connector enables the connection for encoder, alarm light and an external photo cell if necessary.

As with all Cyklop Thermal Inkjet printers, the ink cartridges are recognized automatically with fill level and type.
