TECHNICAL DATA

Height	1074 mm
Width	1500 mm
Length	2374 mm
Weight	250 kg
Power supply	230 VAC
Power absorption	0,75/1Kw

EVERYTHING STARTS FROM A DOT!

As Kandinskij said: everything starts from a dot! EvoPac Dot is our new custom machine particularly designed for those who need an immediate and super easy machine to smoothly wrap every now and then! Extremely versatile, it fits perfectly with low productions and works great when you need to wrap both with hand film and/or with a shrink gun! Dot is driven by an industrial footswitch and an Inverter, allowing us to completely customize its rotation upon your desire. Sided with a potentiometer for rotation speed adjustment, Dot hits the market with the brilliance of its simplicity.

Dot: the starting point.

**PIZZATO -INDUSTRIAL
FOOTSWITCH FOR CYCLE'S
MANAGEMENT.**
